EZ BoatPort™

**For Boats
Up To
5,000 lbs!**

Introducing the New EZ BoatPort from EZ Dock

AFTER A LONG DAY ON THE WATER, EASE INTO PORT

EZ Dock's new EZ BoatPort is the perfect choice for many skiffs, runabouts, fishing boats, and jet boats up to 5,000 pounds. Designed like our other EZ Port® products with an easy drive-on, power-off method of dry docking, the EZ BoatPort is self-floating and can move with the changing water levels. It can even be used in as little as two feet of water. Keeping your boat high and dry, the EZ BoatPort eliminates the need for winching, cranking, or hoisting.

The EZ BoatPort's modular design allows for numerous configurations and additional features to fit a wide variety of boat shapes and sizes. With adjustable rollers and bunks, and the ability to add Side Extensions or a Float Tank with Air-Assist Pump, the EZ BoatPort is the most versatile port on the market.
