

**Low Profile
Rowing Dock**

It takes a crew, working together as one, to win.
Each member moves in sync, driven by the same
goal, as they speed to the finish line.

It may look effortless, but it's a feat that requires
perfect balance and unwavering focus. And at
EZ Dock, we know nothing should stand in the way
of finding that focus. It's why we created a low profile
dock that's incredibly stable and durable, allowing
your crew to get in the water quickly – and connect
with what matters most.

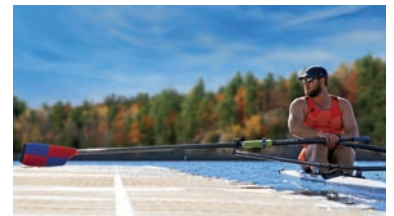

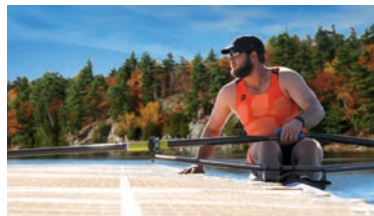

Our patented flotation technology is designed for extreme stability, regardless of dock position

Our low-profile dock is tailored to the needs of rowers both individually or with a team. The freeboard height is extremely low to the water and supremely stable, allowing sure-footed loading, launching and docking from the perfect position for rowing.

INDIVIDUAL ROWERS

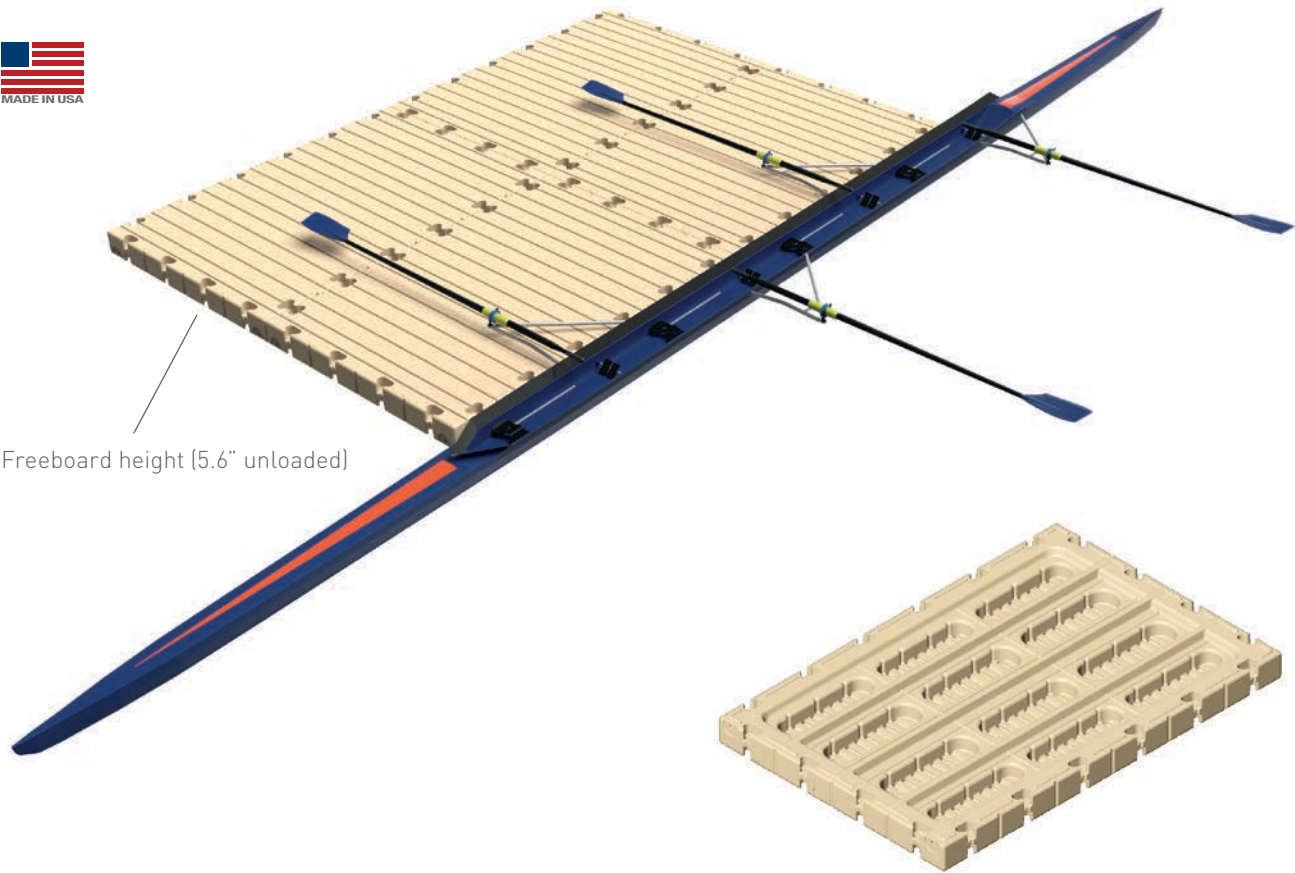

Engineered to meet the needs of both individuals and teams, the Low Pro Rowing Dock will get you out on the water effortlessly.

Our two-stage displacement air chamber design (shown below) creates a stable environment regardless of water height or conditions, giving you the confidence to focus on your rowing session.

Unlike other fixed docks that are set once installed, our coupling system is flexible and adaptable, easily reconfiguring as your needs change.

LOW PROFILE ROWING DOCK

Freeboard height (5.6" unloaded)

(underneath of dock section shown above) Flotation design with displacement air chambers, creates suction effect that enhances stability on the water.

MODEL DESCRIPTION	SIZE (INCHES)	WEIGHT	FLOTATION CAPACITY	PART#
80" LOW PROFILE ROWING DOCK	80" W x 120" L x 8" H	260 lbs.	1,900 lbs	158010

CASE STUDY

Maximizing Training, Minimizing Doubt

Low Profile Rowing Dock Helps College Programs Get More Out Of Practice

Bob Gillette, Head Coach, URI Crew Team

Devastated by the loss of their dock following a flood in 2016, the Columbia Rowing Club in South Carolina knew installing a new high performance rowing dock was critical. College teams that travel miles from the northeast rely on Columbia for critical spring training that can make or break a season.

They chose the Low Profile Rowing Dock from EZ Dock, and teams immediately took notice. Bob Gillette, Head Coach of the University of Rhode Island Crew Team, left extremely impressed.

“The dock is one of the last things you want to think about. Like a referee in sports, if it’s good, you don’t notice it at all. Too often that’s not the case.”

“This is one of the lowest and most stable docks I’ve seen. My team has been to regattas where you need boots on the dock because it submerges or resembles a child’s bounce house. But with the one at Columbia, you could have 16 people on the edge and it’d work perfectly. I’d recommend it to any rowing program.”

With the Low Profile Rowing Dock from EZ Dock, his team was able to concentrate on their rowing session and not the walk to get there, getting the most out of their spring training and leaving better prepared for the season.

“I was impressed with the install. Given this dock is almost 120’ long we anticipated it would be a two day affair putting it in- they had it done in 1 morning. It was a work of art watching how they broke down the pile of materials, set it out, set it on the embankment to be able to put those pieces out into the river, it was very impressive.”

— John Worrell, Columbia Rowing Club President

Enjoy a rowing dock that's designed for
seasons of maintenance-free use

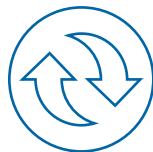

Our Low Profile Rowing Dock provides the utmost stability and convenience for you and your crew. Designed to meet FISA and USA rowing standards, it's a favorite among clubs and universities, giving crews of all sizes easy access to the water upon entry and exit.

With a modular design, our rowing dock is easy to install and integrates seamlessly into existing EZ Dock systems or traditional dock designs.

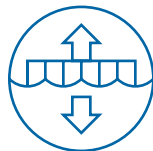

MAINTENANCE-FREE & BAREFOOT FRIENDLY

- EZ Dock's polyethylene docks are durable and slip resistant
- Won't splinter or rot, never needs to be painted
- Cleans easily with soap and water

ADAPTABLE DESIGN

- Unique design delivers outstanding load capacity, functionality, and safety
- Variety of dock sections, boat/PWC lifts, and kayak launches
- Easily customizable design to make your perfect waterfront retreat

FLEXIBLE FLOTATION TECHNOLOGY

- Flotation chambers are constructed for optimal strength and structural integrity
- Designed to provide additional stability on the water
- Dock sections adapt easily to changing water conditions and levels

INNOVATIVE COUPLING

- Made of recycled materials
- Nuts and bolts made of heavy duty, rust resistant composite
- Strength and durability even in the harshest weather conditions
